

## Clinical Veterinarian – San Antonio, TX

UT Health San Antonio (UTHSA) is seeking a Clinical Veterinarian for the Department of Laboratory Animal Resources (DLAR). UTHSA has a large, diverse, AAALAC accredited animal research program. The DLAR has a staff of 40+ personnel including three veterinarians. Vivaria are located on two, geographically distinct campuses with barrier and BSL3 capabilities.

Responsibilities for the position include:

- Provide preventive and clinical veterinary care to all laboratory animal species
- Provide comprehensive surgical support and post-operative care for animals receiving surgical procedures
- Provide veterinary review of IACUC protocol documents
- Contribute to the development of institutional and departmental animal care and use policies and procedures
- Provide didactic and hands-on training of personnel in the appropriate care and use of laboratory animals
- Provide consultation to investigators regarding animal models, experimental design, and logistical research support

The ideal candidate will have training or experience in laboratory animal medicine and surgery to include familiarity with pertinent laws, regulations and policies governing the use of laboratory animals, strong written, oral and interpersonal communication skills, computer proficiency and presentation experience.

Minimum Requirements: Doctor of Veterinary Medicine from an AVMA accredited institution with a minimum of three years of job-related experience and a license to practice veterinary medicine in at least one state in the United States. ACLAM board eligibility or board certification preferred. Under FLSA, incumbents in this position are exempt.
